

Pharmacology check list

- Antibacterial Agents
 - ❖ Topical
 1. Bacitracin.
 2. Gramicidin. – Gram-positive bacteria.
 3. Polymyxin B
 4. Neomycin.
 5. Gentamicin – Gram-negative bacteria
 6. MUPIROCIN
 7. RETAPAMULIN
 8. POLYMYXIN B SULFATE
 - ❖ Topical Antibacterials in Acne
 1. Clindamycin
 2. Erythromycin
 3. Metronidazole
 4. Sodium sulfacetamide
- Antifungal Chemotherapy
 - ❖ Topical
 1. Clotrimazole
 2. Econazole.
 3. Ketoconazole.
 4. Miconazole.
 5. Oxiconazole.
 6. Sulconazole
 7. Topical Azoles
 8. Clotrimazole and Miconazole
 9. Ciclopirox Olamine
 10. Naftifine and Terbinafine
 11. Tolnaftate
 12. Nystatin
 13. Amphotericin B
 - ❖ Topical & systemically :
 1. Triazoles.
 2. Imidazoles
 3. Amphotericin B (Iv)
 - ❖ Oral Antifungal Agents
 1. Fluconazole.
 2. Itraconazole.
 3. Ketoconazole.
 4. Griseofulvin
 5. Terbinafine
- Antiviral Agents
 - ❖ Topical Antiviral Agents
 1. Acyclovir.

- 2. Valacyclovir.
 - 3. Penciclovir.
 - 4. Famciclovir
 - ❖ Immunomodulators
 - 1. Imiquimod:
 - 2. Tacrolimus
 - 3. Pimecrolimus
- Ectoparasiticides
 - ❖ Topical
 - 1. Permethrin
 - 2. Lindane (Hexachlorocyclohexane):
 - 3. Crothamiton
 - 4. Sulfur.
 - 5. Malathion.
- Agents affecting Pigmentation
 - ❖ To whiten
 - 1. Hydroquinone
 - 2. Monobenzone
 - 3. Mequinol
 - ❖ To darken (psoralens)
 - 1. Trioxsalen.
 - 2. Methoxsalen.
 - ❖ Sunscreens :
 - 1. (PABA)
 - ❖ Sunshades :
 - 2. titanium dioxide
- Acne Preparations
 - 3. Retinoic Acid
 - 4. Adapalene.
 - 5. Tazarotene
 - 6. Isotretinoin(Accutane):
 - 7. Benzoyl Peroxide:
 - 8. Azelaic Acid
- Drugs for Psoriasis
 - 1. Acitretin
 - 2. Tazarotene
 - 3. Calcipotiene
 - ❖ Biologic Agents
 - 1. Alefacept
 - 2. Efalizumab
 - 3. Etanercept
- Anti-inflammatory Agents
 - ❖ Topical Corticosteroids
 - 1. Hydrocortisone.
 - 2. Prednisolone and Methylprednisolone.

3. Dexamethasone and Betamethasone.
 4. Triamcinolone
 5. Fluocinonide
 6. Tar compounds
- Keratolytic and Destructive Agents
 1. Salicylic acid:
 2. Propylene Glycole
 3. Urea
 4. Flurouracil
 5. Nonsteroidal Anti-inflammatory Drugs: diclofenac.
 6. Aminolevulinic Acid
 - Antipruritic Agents
 1. Doxepine
 2. Pramoxine
 - Trichogenic and Antitrichogenic Agents
 - ❖ Trichogenic
 1. Minoxidil (Rogaine)
 - ❖ Both
 2. Finasteride (Propecia)
 - ❖ Antitrichogenic
 3. Eflornithine
 - Leishmania
 1. Sodium Stibogluconate
 2. Amphotericin
 3. Miltefosine
 4. Pentamidine
 - Antilepromatous Drugs
 1. Dapsone and Sulphones
 2. Rifampin
 3. Clofazimine
